Full Download Procedure

A full program download of the Hypercom T7 terminal is completed in four steps. The procedure is described below:

1. RAM clearing the current memory in the terminal.
2. Configuring the terminal to accept a new download.
3. A full download takes approximately 30 – 40 minutes. This downloads the shell, or generic programming, into the terminal.
4. Initialization takes approximately 30 - 45 seconds to complete. This downloads the merchant specific information into the terminal.

Step 1. RAM Clearing the Terminal

Initialization Procedure

Before initiating a download, make sure the terminal has the most current application version or it will corrupt the application.

An initialization of the Hypercom T7 terminal is completed in 2 steps. The procedure is described below:

1. Verify the current version in the terminal.
2. Initializing the terminal through Term-Master Suite, which takes approximately 30 seconds – 2 minutes to complete. This downloads the merchant-specific information into the terminal.

Step 1. Verify the current version in the terminal

Step	Display	Action	Key(s)
1	JULY 10, 1998 10:00 SWIPE CUSTOMER CARD	Press:	[FUNCTION]
2	MERCHANT FUNCTION	Press:	[91]
3	MERCHANT FUNCTION 91	Press:	[ENTER]
4	PNSTP7_XXX T7AEPRM401 TERMINAL ID	Verify terminal has the current software version. If not, the terminal requires a Full Download. After verifying the version in terminal, go to next step.	

Step 2. Initializing the Terminal

Step	Display	Action	Key(s)
1	PLEASE INITIALIZE	Press:	[INITIALIZE]
2	INITIALIZE CORRECT? YES OR NO	Press:	[YES]
3	INITIALIZE DIALING NOW... PROCESSING NOW...	No action while terminal initializes	
4	TRANSACTION COMPLETE	Press:	[CANCEL]
5	JAN 01, 1997 14:50 SWIPE CUSTOMER CARD	Terminal is ready to process transactions
